

## Appleton CartMover™ - Light Duty

[www.appletonmfg.com](http://www.appletonmfg.com)

### Compact battery-powered material handling

This battery-powered material handler is perfect for increasing productivity and ensuring worker safety whenever heavy loads on wheels need to be moved. It is as easy to use as a pallet jack – except far more powerful. It's portable and convenient, with no electric cords or pneumatic hoses to trip over. No more injuries from pushing heavy loads.

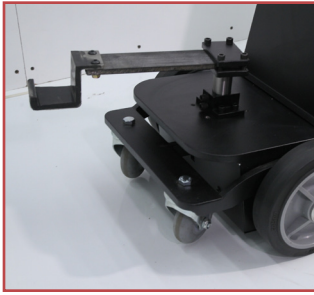

### The Light Duty CartMover™ Drives Productivity!

#### Where can it be used?

- Cell manufacturing facilities
- Vehicle repair or manufacturing
- Hospitals
- Aerospace
- Commercial laundry
- Print and converting facilities
- Shipping and Receiving
- Hospitality
- Anywhere you need to move loads on casters or wheels

#### Features

- On board charging
- Compact size
- Variable speed throttle control
- Easy to use
- Differential drive system
- "Belly button" reverse switch
- Rugged steel frame construction
- Durable multi-surface wheels
- Superior OEM Support

**Designed for Safety and Productivity**

## **The Light Duty CartMover™ is engineered to keep workers safe.**

We believe people like to be productive on the job. That's why so many injuries occur every year as workers try to move heavy loads by themselves. They either thought the load would roll on its existing wheels ... or they simply were not patient enough to wait for a lift or tow motor. Now the CartMover™ can change all that.

The CartMover™ is a heavy-duty tool, but light enough to be easily maneuvered by anyone. Our innovative battery-powered design provides the mobility needed to increase worker productivity while enhancing safe work practices.

**On Board Charging System with Indicator**

## **Choose Your Hitch**

The Light Duty CartMover™ can be equipped with a variety of pre-engineered or custom hitches to connect securely to various carts, bins, vehicles or other wheeled loads.

**Durable Multi-Surface Wheels**

## **No Down Time for Recharging**

The Light Duty CartMover™ features an integrated quick charging system with on board battery packs and can be plugged into a standard 110v outlet. Typically a fully depleted battery can be recharged in approximately 3 hrs.

**Ergonomic Controls**

## **Risk Free Demo of the Light Duty CartMover™**

We will ship a Light Duty CartMover™ to your location to use for a limited time with no obligation to buy. See for yourself how its mobility, ease-of-use and overall design improve safety and productivity. Certain conditions apply, contact Appleton Mfg. Division at 1-800-531-2002 for more information.
